

## E-GOVERNANCE

Electronic Governance is the application of Information Technology to the process of government functioning, in order to bring SMART governance. Emergence of Informational Technology on the National Agenda and announcement of IT policies by state Governments in India has gained importance for good governance and sustainable development.

SST focuses this initiative through **LAMIS- (Local Administration & Management Information System)**.

'**LAMIS**' product is specifically designed for real-world needs of Municipal Corporations .By managing the activities of the Corporations. Staff of Municipal Corporations can able to take the correct Decisions in right time, thus the Time involved in the decision-making is shortened.
